Rheem Solar Solutions

Residential & Commercial

Dealer & Installer
2026 Catalogue

We’re committed to Aotearoa – the land, the people, and our future.

One of the biggest advantages of switching to solar is that it dramatically reduces your impact on the environment. Solar systems generate energy without the aid of fossil fuels, instead harnessing the natural energy provided by the sun. Converting to solar will immediately lower your carbon footprint, cut your power bill, and help your business or home enjoy a more sustainable lifestyle.

We’re committed to the future of Aotearoa, and we know solar is essential to this country’s path towards sustainability. Our goal is to make converting to solar easy for Kiwis, no matter where they live in NZ. Install a Rheem Solar Solution and join the smart energy revolution.

Rheem is a member of the Sustainable Energy Association of New Zealand, SEANZ.

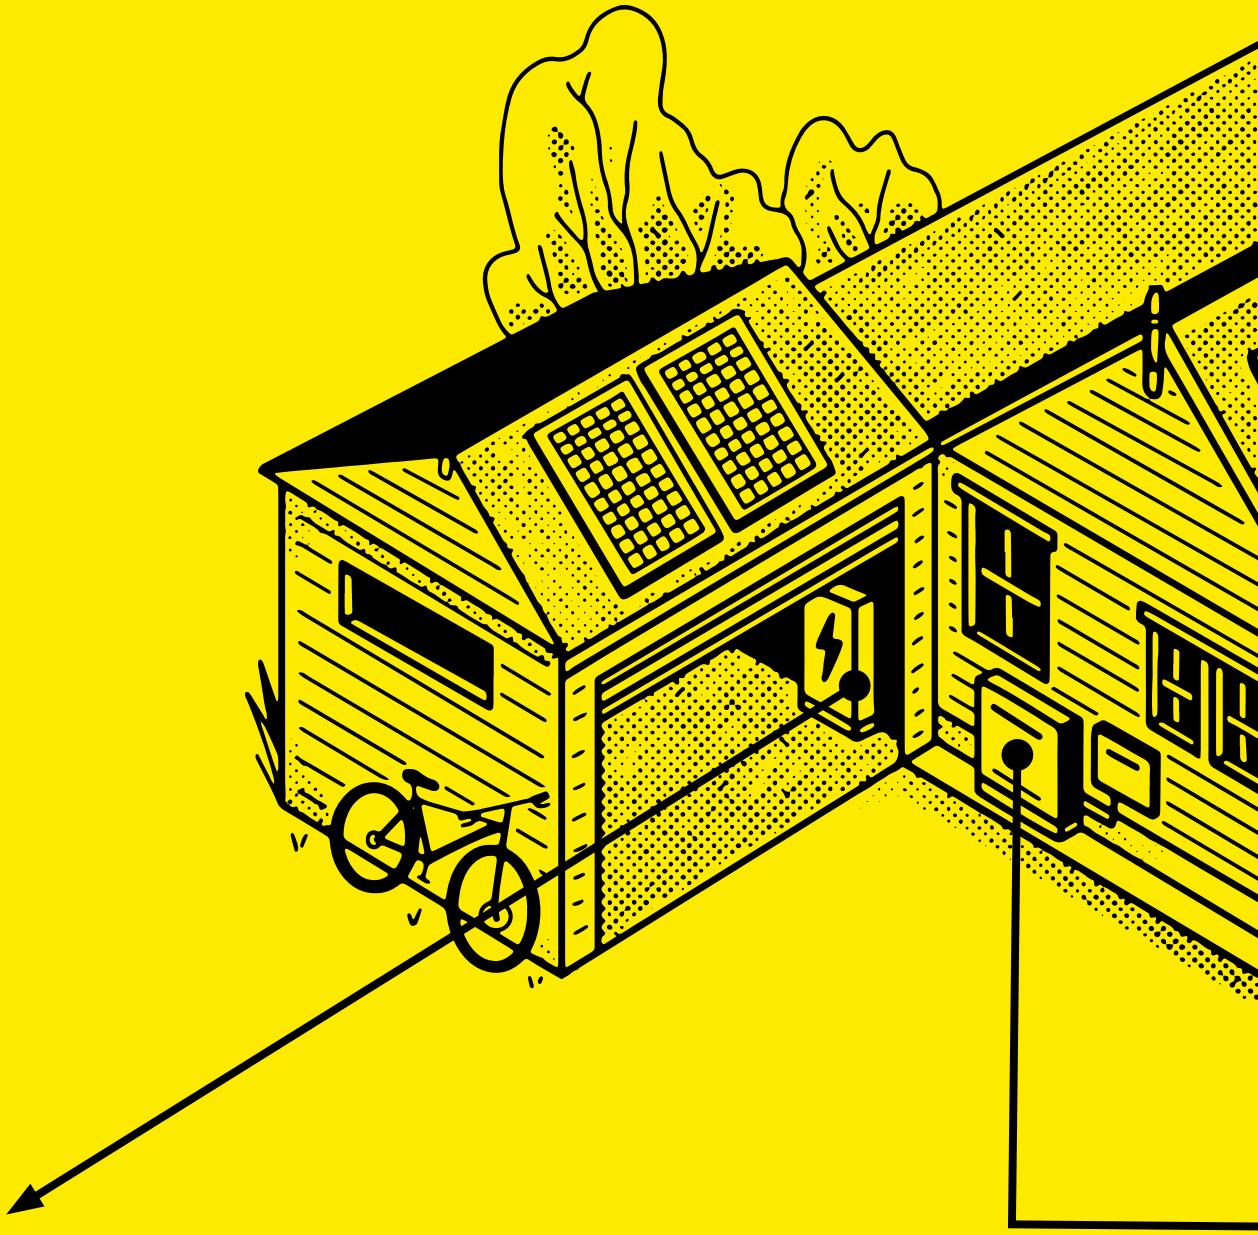
t the forefront with innovative, high-quality
vorld-leading inverters and high-efficiency solar
w Zealand's variable weather conditions and
ensure it meets our strict quality criteria before

EEM

How solar works

Solar power doesn’t need to be complicated. From panels to racking, Rheem has everything you need to join the smart energy revolution.

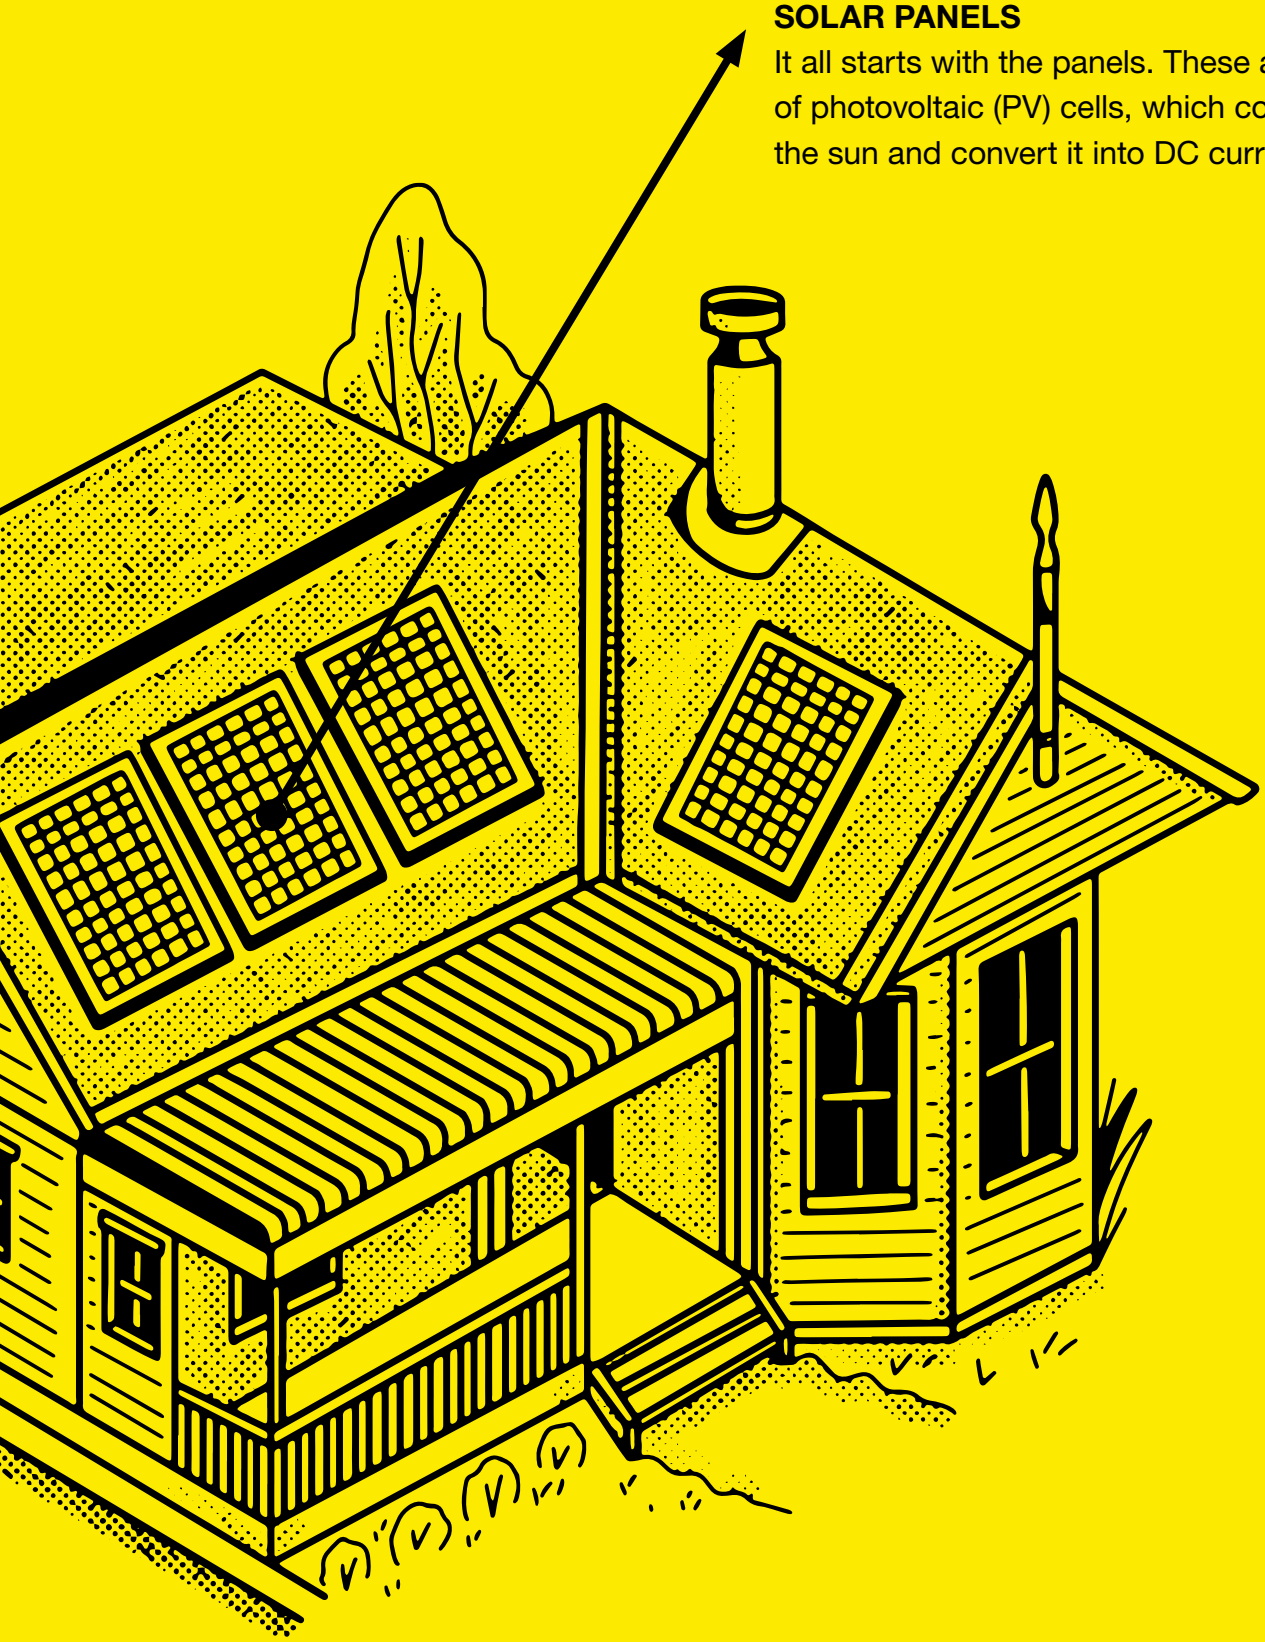


BATTERIES & EV CHARGERS

You’re going to need a way to store the power produced by the solar panels, and that’s where batteries come in. They charge during the day using electricity generated from solar panels and power your home in the evening when the sun goes down. We‘ve also introduced EV chargers to the Rheem Solar Solutions range to ensure homeowners have all their energy needs covered.

SOLAR PANELS

It all starts with the panels. These are made up of photovoltaic (PV) cells, which collect light from the sun and convert it into DC current.



INVERTERS

To make this power produced by the solar panels usable, an inverter is required. In short, an inverter is an electronic device that converts the DC power generated by the solar panels into AC power at the correct voltage for the grid.

Rheem Solar Solutions

We have a solar solution for every household, business and commercial property. Thanks to our strong network of partners worldwide, we have an extensive range of solar products currently available in NZ. Along with the significant stock we hold in our Auckland and Christchurch warehouses, we also have access to product from both the manufacturer's stock in Australia and the Rheem Australia warehouse stock, which means better lead times on indent product for our customers. Our sales team also operate around the country, so you can be sure that support is never far away.

Alongside our sales support, we provide design tools and assistance via the Rheem Solar Team. We work in partnership with our customers, and our experienced, responsive technical sales team are always keen to assist with solving project challenges. They can help you design systems, prepare system schematics/specifications and provide basic wiring schematics, and will even offer quoted solutions based on a client's power needs and building.

We only partner with quality manufacturers, and all our brands are proven names you can trust. And with quick access to a wide range of local and international products, our industry-leading solar solutions come at a competitive price.

GOODWE YOUR SOLAR ENGINE

FIMER

ASTRONERGY

ENPHASE

CLENERGY

Our services also adhere to the New Zealand standards for system design and implementation, including:

- AS/NZ 3000 Wiring Rules
- AS 3008 Selection of Cables
- AS/NZS 4777 Grid Connection of energy systems by inverters
- AS/NZS 5033 Installation of PV Arrays
- AS 4509 Stand-alone power systems*
- AS 3595 Energy management programs
- AS 1768 Lightning Protection

* note some aspects of these standards are relevant to grid connect systems

Solar Panels

Collecting the sun's energy is no easy feat, and it shouldn't come as a surprise that not all solar power panels are equally effective. We only select panels that are proven to be resistant to Potential Induced Degradation (PID) and Light Induced Degradation (LID), with state-of-the-art cell technology for excellent performance under real conditions and anodised frames built to withstand extreme weather conditions. Before we include them in our range, our panels are tested for optimum performance and efficiency using solar panel flash test data and Electroluminescence (EL) imaging.

We have a range of solar panels to suit your needs, including the all-black Solahart Silhouette panel. The Silhouete provides the ideal solution for residential homes thanks to its innovative and premium cell technology. Designed in Germany and built to withstand Australian and New Zealand weather conditions, these panels have an incredibly low rate of panel degradation. In fact, their output is guaranteed to be at least 86% of the nominal power for up to 25 years, which means you're sure to enjoy energy free from the sun, for years to come.

The high-performance Solahart SunCell panel is another reliable option which offers great value for money. With innovative half-cell technology and excellent power efficiency that results in more energy production per square metre, the Solahart SunCell ticks all the boxes on durability.

Astronergy has continuously launched the high-quality ASTRO series solar panels, which can be applied in various application scenarios, such as utility-scale solar farms, commercial & industrial solar projects and residential solar solutions.

Inverters

ALL
PRODUCTS

Inverters are the 'brains' of your solar power system. Their primary function is to convert the direct current (DC) output into alternating current (AC) – AC is the standard used by all home appliances. And just like solar panels, not all inverters are built the same.

Your inverter needs to provide efficiency and reliability so you can get the most power out of your solar system – which is why Rheem only selects inverter suppliers we can trust. Our range of Enphase, FIMER and GoodWe inverters are world-class products we're proud to stock. They are also the perfect partners for our high-efficiency solar panels and our range of battery storage solutions.

Before releasing new models into our product range, we thoroughly check certifications and performance data from the manufacturer, and we also perform our own field tests to ensure quality and reliability. For that extra piece of mind, all our inverters come with a 10-year warranty.

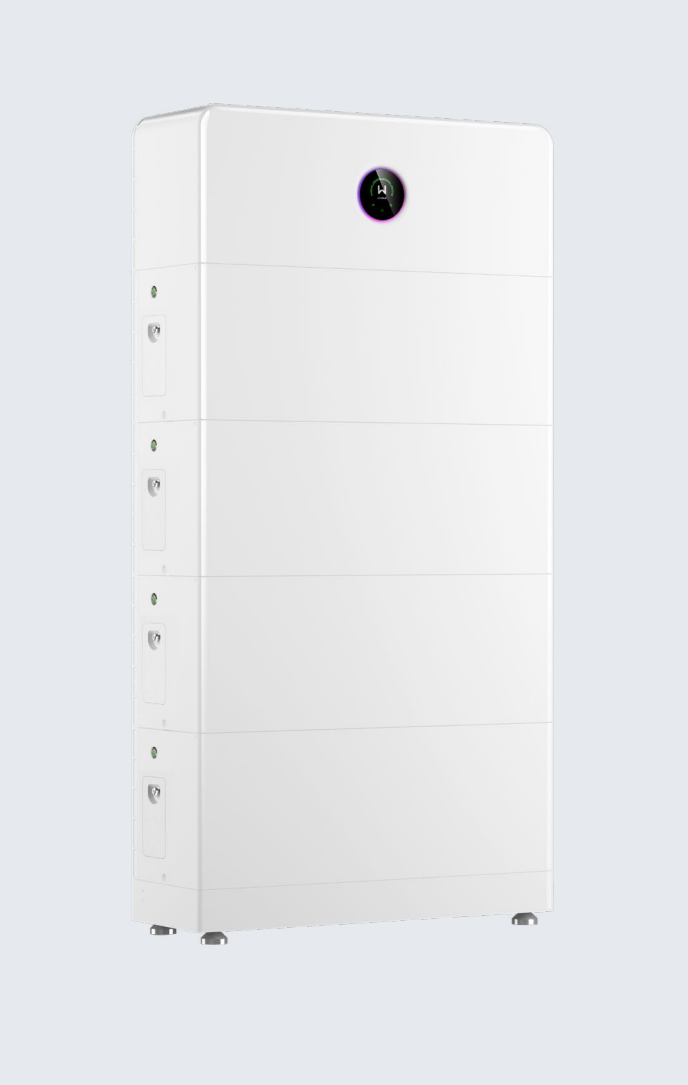
Dimension H × W × D (mm)	505.9 × 434.9 × 154.8	505.9 × 434.9 × 154.8 *AC Coupled battery inverter

*1 4600W for VDE0126-1-1&VDE-AR-N 4105 and CEI 0-21. *2 For CEI 0-21 GW5000S-BP is 5100W; for VDE-AR-N4105 GW5000S-BP is 4600W. *4Can be reached only if PV and battery power is enough. *5 The actual charge and discharge current also depends on the battery. †For full details see the manufacturer's warranty statement. *For full details see Solahart Owner's Guide & Installation Instructions

ESA Series

ALL
PRODUCTS



The GoodWe ESA Series is a fully integrated all-in-one solar and storage solution that combines inverter and battery in a pre-wired, modular design-making installation significantly faster and easier. Engineered for flexibility, the ESA system allows seamless expansion to meet evolving energy needs, with scalable battery capacity for future upgrades. With its streamlined setup, the ESA Series can reduce installation time by up to 50%, making it an ideal choice for efficient and adaptable residential energy systems. It also supports dynamic tariff optimisation.

ESA Series – GoodWe

Actual available energy may vary depending on charge / discharge rate, environmental conditions (e.g. temperature), transport and storage factors.

Batteries

ALL
PRODUCTS

In most New Zealand homes, a large proportion of the energy produced by solar power panels is sent back to the grid because it's generated when it's not needed (e.g. in the middle of the day). Adding home battery storage to a new or existing solar power system allows you to store your unused energy to use at night, on low sunlight days, when utility rates are more expensive or during blackouts. Batteries also provide a smart way to offset your electricity costs as you maximise your solar energy usage and minimise your reliance on the grid.

In August, we'll also be introducing the brand new Enphase IQ Battery 5P to our existing GoodWe battery range. With its app-based monitoring and control, the Enphase IQ allows homeowners to enjoy the benefits of a complete home energy management system. It comes in a modular 5 kWh capacity to the provide the most flexibility for a customer's storage requirements, and installation is quick and easy!

BAT Series

ALL
PRODUCTS

The GoodWe‘s BAT Series high-voltage lithium batteries, available in 61.4kWh, 92.1kWh, and 112.6kWh capacities, are specifically designed for small to medium-sized commercial and industrial (C&I) applications. Paired with GoodWe ET 15-30kW and ET 40-50kW hybrid inverters, Static Transfer Switch (STS) box, the BAT battery system provides a complete, easy-to-install, and highperformance energy storage solution. This powerful system delivers efficient energy backup, peak shaving, and optimised load management.

BAT Series – GoodWe

60-112kWh I C&I BATTERY SYSTEM

Optimisers

ALL
PRODUCTS

Optimisers allow you to get the most energy prodction possible from your Rheem Solar Solution, even in areas of shade or dust. Tigo optimisers, in particular, connect to each solar module in seconds and unlock 25+ years worth of additional benefits for your installation. The Tigo TS4-A-O improves production, safety, and intelligence in both new designs and existing systems. Easy installation and long-term reliability reduce system downtime and truck rolls, while Tigo's Energy Intelligence platform enables quicker onsite commissioning and comprehensive remote monitoring.

The Tigo Access Point (TAP) improves the data management of your solar array by wirelessly communicating with Tigo smart modules and retrofit devices. TAP also greatly improves safety with module-level deactivation. When paired with a Cloud Connect Advanced (CCA), the TAP provides unparalleled visibility into your solar installation.

Optimisers – Tigo

Tigo TS4-A-O

Technical Data

Model	TS4-A-O
Maximum System Voltage	1000 V/1500 V
Input Voltage Range (V_{MP})	12 – 80V
Input Current (IMP)	16 A/22 A
Maximum Output Power	725 W
Recommended Fuse Rating	30A
TS4 Conductor (AWG)	12
Weight (g)	520
Dimensions (H × W × D)	139.7 x 138.4 x 22.9 mm
Outdoor IP Rating	IP68
Maximum Elevation	3000m

Access Point – Tigo

Tigo Access Point (TAP)

Technical Data

Model	Tigo Access Point
Input Voltage Range	$5V_{DC}$ - $25V_{DC}$
Consumption	0.5W average, 1W peak
Recommended Cable Type	RS485, 18-22AWG
Operating Temperature Range	-30°C to +70°C
Environmental Rating	IP68, Type 4R
Maximum distance from TAP to closest TS4 (m)	10m
Maximum distance from TAP to farthest TS4 (m)	35m
Total TS4 units supported*	Up to 300
Weight (g)	227
Dimensions	126.2mm x 130.0mm x 26.8mm (with bracket)

*environmental conditions can impact the number of units supported

EV Charger

ALL
PRODUCTS

With rising energy prices, solar owners are now looking to maximise self-consumption and back-up of PV power. By combining GoodWe inverters and Lynx Home Series battery options, homeowners can create a smart and highly efficient energy storage system. Now, NZ home owners with an electric vehicle (EV) can further expand their system by including a GoodWe EV Charger to maximise their energy independence. With its modern, user-friendly design, superb safety and reliability ratings, remote control and monitoring, and flexible adaptable applications, the GoodWe EV Charger is the perfect fit for a wide variety of homes.

EV Charger – GoodWe

Racking & Components

We can provide all the equipment you need to set up your solar solution. Whether you're looking for a residential or commercial application, our range of racking and components will make the installation process safe, secure and straightforward.

We only stock robust products that can endure the often-harsh NZ conditions, including a selection of the popular PV-ezRack range. PV-ezRack have embraced sustainable design, offering the solar industry creative and versatile racking solutions.

Their robust systems are suitable for both tin and tile roofs and can be adapted across a wide range of applications. Unique Kliplok clamps and accessories compliment PV-ezRack's technically advanced solar mounting gear, ensuring you have everything you need to install your solar solution.

CLENERGY

ALL
PRODUCTS

Racking – SolarRoof

PV-ezRACK®

Reliable, robust roof mounting system with high quality components designed for the harshest conditions.

PV-ezRack® SolarRoof has been developed for both residential and commercial PV installations on tin and tile roofs. The components are easy to install and can be used for flush as well as tilted systems, on a large variety of roof types. The interfaces, rails and clamps use high quality, robust and corrosion resistant materials including structural grade aluminium alloy (AL6005-T5) and stainless steel (SUS304)

Quick and Easy Installation

Innovative and internationally patented, the Z-Module and Click Module technology are used in almost all SolarRoof components. The Z-Module and Click Module quick provide easy and safe installation method. They can be inserted into the rail at any given point, and secured with just two or three hand grips.

Versatility

A large variety of roof hooks, metal roof fixings, tilt legs and adapters help ensure that you will find a suitable fixing method for almost every roof, where fixing with penetration is required.

Wide Range of Tilting

With three adjustable tilt legs, these parts can tilt panels from between 10-60 degrees. Through its innovative design, the tilt legs can cope with all common purlin distances.

Universal

SolarRoof has suitable inter and end clamps for every size of solar panel including frameless, thin film panels or special clamps for cyclonic regions. In the growing range of clamps, cable clips, adapters and accessories you are sure to find the parts you require for your residential or commercial rooftop mounting needs.

Racking – SolarTerrace II-A

PV-ezRACK®

Pre-assembled, durable and earthed ground mount frame with ramming

PV-ezRack® SolarTerrace II-A is a pre-assembled ground mount system with full earthing function suitable for commercial and utility scale installations. This quality frame is trimmed at every angle for fast deployment reducing labour costs. It was designed with a unique post profile which allows reduced embedment and therefore saves on material and labour. These features, combined with its high grade of pre-assembly make SolarTerrace II-A one of the best ground mount system you can find.

Reduced Labour Costs

Through our unique, patented component design and pre-assembled supports with pre-installed positioning clamps** labour time and costs are greatly reduced.

Reduced Component Costs

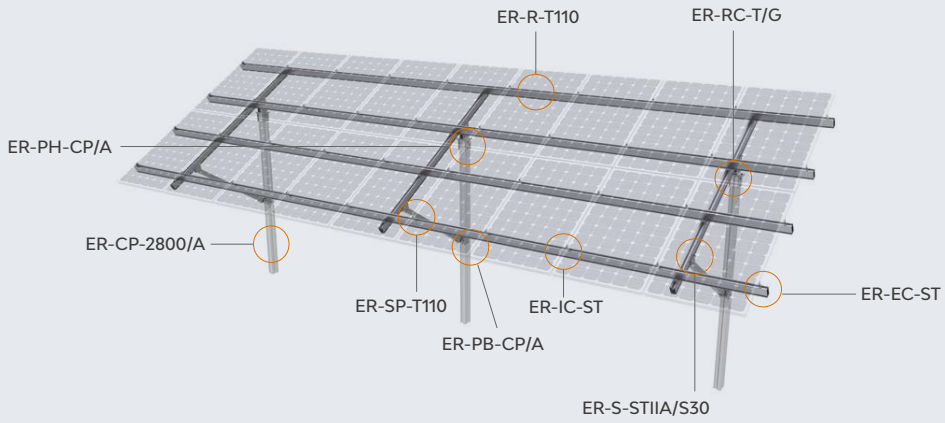
Our unique C-Post was designed specifically for ramming. This results in an increased friction against up-lift and it therefore requires less embedment as conventional standard posts or I-beams, which reduces not only labour time for ramming but also material costs.

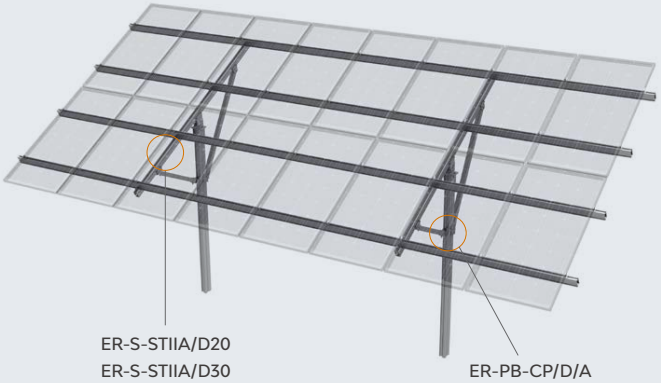
Wide Range of Adjustments

As ramming can never be done exact on millimetre, the post head is designed with sufficient horizontal rotation and vertical adjustments. This combined with a generous design tolerance levels makes it easy to get the panels perfectly aligned even if the ramming isn't 100%.

Full Earthing Function

With pre-fitted pressure bolts and star washers in post head, post brace and pre-assembled support, it can create earthing continuity from T rail to post. In this way, SolarTerrace II-A system is a full earthing system.





10 Year Warranty
Utility & Commercial

Racking – SolarTerrace III-A

PV-ezRACK®

Universal and earthed ground mount frame for corrosive environments and for tough soil conditions

Manufactured from high quality structural grade and anodised aluminium, PV-ezRack® SolarTerrace III-A is the perfect mounting solution for corrosive environments. The support legs can be installed either with concrete ballast footing or on ground screws which makes it suitable for almost every soil condition. Its user friendly high level of prefabrication makes it easy to install and therefore practical for smaller commercial and even for residential installations.

Durable Even in Harsh Environments

STIII-A contains only 6005 Aluminium alloy and 304 stainless steel (316 on request), which makes it suitable for even the toughest environments, such as corrosive sites close to coastlines.

Support Leg Is Delivered in One Piece

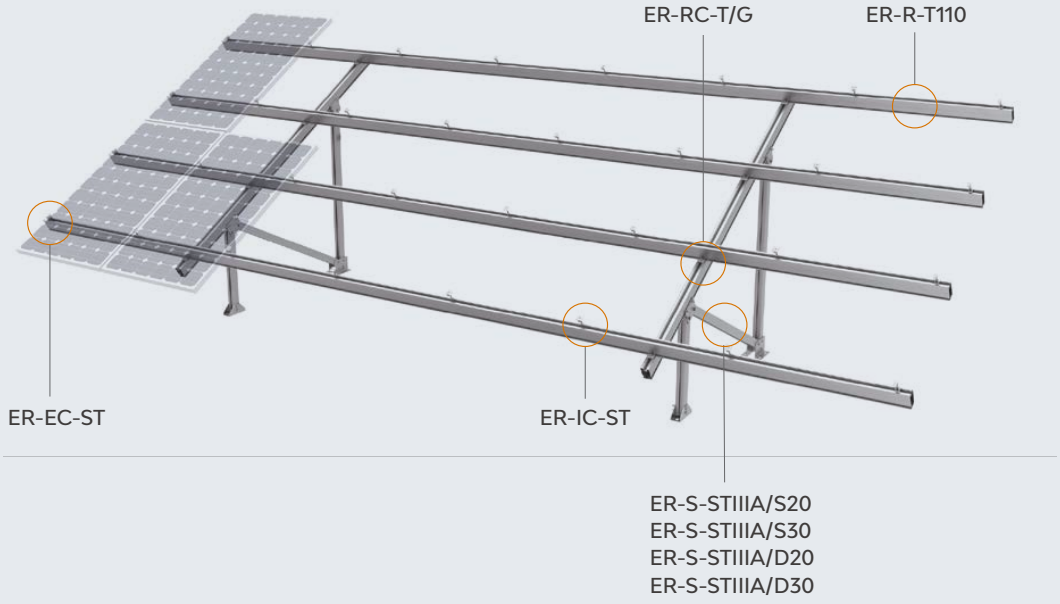
The support legs of the STIII-A are completely pre-assembled, they only needed to be opened up and secured to the foundation. They even have the positioning rail clamps pre-installed**, so you don't need to measure and mark the rail positions anymore. The combination of these features is saving valuable time in assembly and logistics, making it one of the fastest system on the market.

Suitable for All Soil and Ground Type

The support legs can be installed either with a concrete ballast footing or with ground screws. This makes STIII-A suitable for the most challenging soil conditions where ramming is not possible.

Full Earthing Function

With pre-fitted pressure bolts and star washers in the pre-assembled support, it can create earthing continuity from T-Rail to support. In this way, SolarTerrace III-A system is a full earthing system.



10 Year Warranty
Utility, Commercial & Residential

Racking – PostMount 1/2/3-A for XL Panels

PV-ezRACK®

Robust pole mount system with adjustable angle for one, two and three XL panels

Clenergy's PV-ezRack® PostMount 1/2/3-A for XL Panels delivers flexible and durable designs to mount from one to three panels, up to 2100X1100mm per post. It's ideal for remote off-grid applications such as water pumps or small residential and commercial systems. The panel tilt is easily adjustable between 10° and 60° throughout the year and comes with hassle-free mounting thanks to patented components such as the PV-ezRack® rails and clamps. The combination of high quality aluminium, stainless steel and galvanised steel components make this a robust, reliable system with excellent corrosion resistance.

Suitable for Every Soil Condition

With its concrete foundation, PostMount-A can be installed on even or uneven ground or on a slope, making it suitable for any soil type and a wide range of applications.

Adjustable Tilt Angle

The steel cap (post head) is designed to tilt panels between 10° and 60° to ensure that you get the required power output you need anywhere, anytime. Changing the angle merely requires a single pair of spanners.

Robust and Reliable

Mounted on aluminium rails the panels are supported by robust galvanised steel landscape and master tubes secured with stainless steel bolts. The post can be fixed into a concrete foundation and also used as a ramming option.

Quick and Easy Installation

Innovative and internationally patented, the Z-Module technology is used in almost all PV-ezRack® components. The Z-Module provides a quick, easy and safe installation method and can be inserted in to the rail at any given point, secured with just three hand grips.

Racking – PostMount 4/6-A for XL Panels

PV-ezRACK®

Robust pole mount system with adjustable angle for four and six XL panels

Clenergy's PV-ezRack® PostMount 4/6-A for XL Panels delivers flexible and durable designs to be mounted between four and six panels, up to 2100x1100mm per post. It's ideal for remote off-grid applications such as water pumps or small residential and commercial systems. The panel tilt is easily adjustable between 10° and 60° throughout the year and comes with hassle-free mounting thanks to patented components such as the PV-ezRack® rails and clamps. The combination of high quality aluminium, stainless steel and galvanised steel components make this a robust, reliable system with excellent corrosion resistance

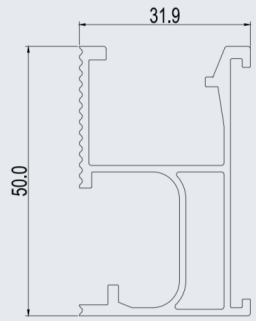
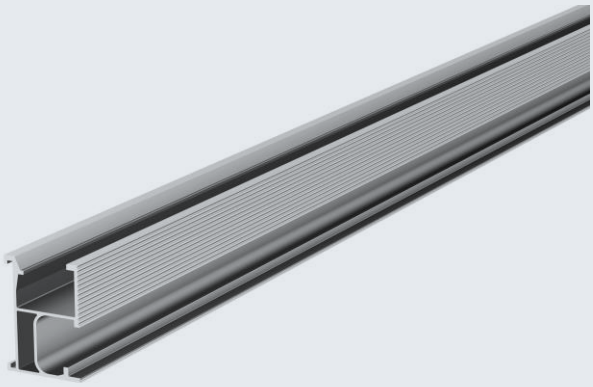
Racking – Elite Rail ER-R-ELT/XXXX/BA

PV-ezRACK®

Part No.: ER-R-ELT/XXXX/MF, ER-R-ELT/XXXX/BA

Roof type	For Clenergy' s PV Mounting System
Dimension	W31.9mm*H50.0mm
Standard Length	3600, 4400 and 4600mm
Packaging	90 pcs per pack; 4 packs (360 pcs) per pallet
Weight	0.695 Kg/m
Material	AL6005-T5
Color	ER-R-ELT/XXXX/MF: Silver (Mill Finished) ER-R-ELT/XXXX/BA: Black (Black Anodised)
Standard	AS/NZS 1170.2:2021





Support & Where to Buy

We have a passionate sales team who operate around the country, so support for your solar solution is never far away. Our Rheem Solar Team can also provide design tools and are available to solve project challenges.

We can help you design systems, prepare system schematics/specifications and provide basic wiring schematics, and will even offer quoted solutions based on a client's power needs and building.
